

VIBECODE

How to Set Up:

Get the Files: You should have a few files:

index.html: This is the main webpage that runs the game.

style.css: This file tells the webpage how to look cool with colors and sizes.

script.js: This file is the brain of the game, making everything work.

An images folder: This folder holds all the pictures for your adventure. Make sure this folder is in the same place as your index.html file.

Open in Your Browser: That's it! Just find the index.html file on your computer and double-click it. It should open right up in your favorite web browser (like Chrome, Firefox, Safari, or Edge).

How to Play:

Start Screen: When the game loads, you'll see a title and a big green "Start Game" button. Click that button to begin your adventure!

The Story Unfolds: You'll be presented with a story and a question with three choices. Read carefully!

Make Your Choice: Click on the button that you think is the best answer.

Keep an Eye on Your Hearts: In the top left corner, you'll see some hearts. These show how many chances you have. If you make a wrong choice sometimes, you might lose a heart.

Game Over or Victory! If you lose all your hearts, the game will be over, and you'll see a "Play Again!" button. If you make it through all the challenges, you'll get a victory message and the same "Play Again!" button to start a new adventure.

Have Fun! This is your chance to explore a wacky Minecraft-inspired world and see what happens with each choice you make!

Game Description: "Minecraft Movie Adventure!"

Get ready for an exciting and unpredictable journey inspired by the world of Minecraft! In "Minecraft Movie Adventure!", you'll find yourself in the middle of a thrilling story filled with familiar creatures, surprising encounters, and tough decisions.

Will you bravely step through a shimmering portal? How will you react when a hissing Creeper approaches? Can you outrun a horde of Zombies or maybe even confuse an angry Steve?

This isn't just a game; it's an interactive story where your choices shape the adventure. With each click, you'll navigate through funny, dangerous, and sometimes just plain weird situations. Keep your wits about you, because one wrong move might cost you a life!

Featuring:

A branching storyline where your decisions matter.

Encounters with iconic Minecraft mobs and characters.

A health system represented by hearts, so choose wisely!

Cool images to bring the story to life.

A start screen to jump right into the adventure and a "Play Again!" button for endless fun.

So, are you ready to become the star of your own "Minecraft Movie Adventure!"? Click "Start Game" and let the blocky chaos begin!
